

Infrastructure - Task #2463

Bug # 2449 (Closed): knb unicode identifier create and get failures

identifiers with "?" not being preserved

2012-03-09 15:32 - Ben Leinfelder

Status:	Rejected	Start date:	2012-03-09
Priority:	Normal	Due date:	
Assignee:	Ben Leinfelder	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Sprint-2012.09-Block.2.1	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description			
For these tests, only the part of the identifier before the "?" is preserved when it is processed by the rest service.			
Test 30: Error: get : path-ascii-doc-example- http://example.com/data/mydata?row=24			
Test 31: Error: get : path-ascii-doc-example-ldap://ldap1.example.net:6666/o=University%20of%20Michigan,c=US??sub?(cn=Babs%20Jensen)			
It seems like "?" should be encoded as "%3f" so that they are not considered the beginning of a query param.
