<b>Milestone:</b>	CCI-1.0.0		
<b>Product Version:</b>	*		
<b>Description</b>			
XSL transform of eml science metadata documents currently displays 'access policy' and 'access control' information from the science metadata.			
This data does not reflect the access/control policy for the DataONE system - instead reflecting access policy on the original document storage system.			
Regardless - we don't want to display any access/control information on the metadata view currently. Remove.			
eml-access.xsl defines template - however this template is referenced in several other xml-*.xsl documents.

- Status changed from In Progress to Closed

Complete.

Removed eml-access.xsl from base eml.xsl transform document. Removed references to templates defined in eml-access.xsl that appear in other \*-eml.xsl docs.
