

Infrastructure - Task #2490

ReplicationManagers on 3 CNs should only create one task per replica node

2012-03-15 00:32 - Chris Jones

Status:	Closed	Start date:	2012-03-15
Priority:	Normal	Due date:	
Assignee:	Chris Jones	% Done:	100%
Category:	d1_replication	Estimated time:	0.00 hour
Target version:	Sprint-2012.11-Block.2.2	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description After testing d1_replication across multiple CNs, we're seeing 2 to three calls to MN.replicate() on the target nodes, when there should only be one (unless an exception is caught and a second try is fired). In the case of an HTTP 200 (true) return, we're still seeing 2 calls.			
Subtasks: Task # 2491: Evaluate ReplicationManager.createAndQueueTasks() for locking problems

- Status changed from New to Closed

Some small changes to ReplicationEventListener look to have fixed the issue.
