There is concern that inputstreams are being truncated by ChecksumUtil and/or resetting the inputstream in a way that corrupts the content. Need to verify that this is the case. May also be an issue particular to EML parsing -TBD

#2 - 2012-03-26 17:02 - Ben Leinfelder

- Status changed from New to Closed

Does not appear to be an issue now. Other bugs were resolved surrounding this, and it seems to have been fixed as part of that. I don't believe ChecksumUtil is corrupting content at this point.
