History

#1 - 2012-03-22 20:07 - Rob Nahf

- Subject changed from refactor identityManager.getSubjectInfo to throw NotFound to refactor IdentityManager's CNIdentityLDAPImpl.getSubjectInfo() to throw NotFound

#2 - 2012-03-22 20:41 - Rob Nahf

- Status changed from New to Rejected

there's not a clean way to produce a NotFound from the LDAP exception, (would have to do a string match on the exception message), and can work around in the SessionAuthorizationFilter with much lower impact to other applications that use the IdentityManager.
