Infrastructure - Bug #2546

Inconsistency between listObjects implementation and documentation

2012-03-27 12:29 - Dave Vieglais

Status:	Closed		**Start date:**	2012-03-27

Target version:	Sprint-2012.11-Block.2.2			
Milestone:	CCI-1.0.0		**Story Points:**	
Product Version:	*			

Description

listObjects on MNs and CNs is documented to take a "formatId" parameter, however the services on both CNs and MNs do not respond to formatId though do respond as expected to objectFormat being used in its place.

e.g.: GMN

https://gmn-dev.dataone.org/mn/v1/object?count=0&formatId=application%2Foctet-stream

vs

https://gmn-dev.dataone.org/mn/v1/object?count=0&objectFormat=application%2Foctet-stream

e.g.: CN

https://cn-sandbox.dataone.org/cn/v1/object?count=0&formatId=application%2Foctet-stream

vs

https://cn-sandbox.dataone.org/cn/v1/object?count=0&objectFormat=application%2Foctet-stream

Simplest solution is to update the API documentation to match the implementations.

History

#1 - 2012-04-02 17:01 - Dave Vieglais

- Status changed from New to Closed

Implementations updated to match docs, i.e. use "formatId" instead of "objectFormat".
