Description

The time stamp for dateSysMetadataModified for all system metadata on the DAAC MN is set to "2010-03-30T00:00:00.000+00:00" and the dateUploaded is for example "2011-12-06T12:04:06.000+00:00"

dateSysMetadataModified should always be equal to or newer than dateUploaded. On initial create, the two values will likely be the same.
