<b>Product Version:</b>	*		

**Description**

When an ORE resource map that references documents that are archived is processed for the search index - a logic error prevents the ORE map from indexing. Logic error related to handling 'archived' documents which results in processing asserting the archived document should be present in the search index before processing the data package - which is not the case since the search index does not contain archived documents.

Updated test class SolrIndexDeleteTest with new scenario to capture this issue.

History

#1 - 2012-04-10 15:26 - Skye Roseboom

- Status changed from In Progress to Closed

Fixed logic issue - missing params in boolean expression created bug wrt archived docs.

Added test case to verify logic issue fixed.

#2 - 2012-04-10 16:14 - Skye Roseboom

- Target version set to Sprint-2012.15-Block.2.4
