Target version:	Sprint-2012.19-Block.3.2	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description			
<p>A recent correction in the DataONE APIs corrects an oversight that would prevent replication of content from a Tier 1 member node such as the Mercury based nodes.</p> <p>A method "getReplica" has been moved from Tier4 to Tier1, and so must be supported.</p> <p>For a Tier1 implementation, getReplica is the same as a regular "get()" operation except that the call is logged as a "replica" event instead of a "read".</p> <p>The method is documented at: http://mule1.dataone.org/ArchitectureDocs-current/apis/MN_APIs.html#MNReplication.getReplica</p>
