Category:	d1_cn_service		**Estimated time:**	0.00 hour
Target version:	CCI-0.4			
Milestone:	None		**Story Points:**	
Product Version:	*			

Description

If we need to wrap the requests for both proxies into an HTML Request wrapper, then we should create a single class to return that object rather than having a private object in each controller.

Class will need to be extended in time to support more overwritten attributed, but for now, it works just fine.
