

Infrastructure - Bug #2743

listObjects impl's do not support consistent slicing

2012-05-10 21:56 - Rob Nahf

<b>Status:</b>	Closed	<b>Start date:</b>	2012-05-11
<b>Priority:</b>	Normal	<b>Due date:</b>	2012-10-27
<b>Assignee:</b>	Dave Vieglais	<b>% Done:</b>	100%
<b>Category:</b>	Documentation	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Sprint-2012.41-Block.6.1	<b>Story Points:</b>	
<b>Milestone:</b>	CCI-1.1		
<b>Product Version:</b>	*		
<b>Description</b> for example, gmn imposes a limit of 1000 records allowed to be returned, and throws an InvalidRequest if asked to return more.  We need to either standardize slice limits across implementations, or modify libclient methods to work-around the limitation by making multiple calls.  algorithm: 1. call listObjects without count parameter 2. if resulting count < total, make count the increment, and call back to server for the next set. 3. repeat until total is reached.			
<b>Subtasks:</b> Task # 2747: fix testListObjects_FormatIDFilter test to work around the limitation <b>Closed</b> Task # 2748: update documentation for all slicing methods on count behavior <b>Closed</b> Task # 2749: take out InvalidRequest response from GMN when count parameter is too high... <b>Closed</b>

I would say this is a bug in GMN. A request for 2000 (or unlimited) objects is valid according to the DataONE specs, and so an InvalidRequest should not be thrown.

#3 - 2012-05-21 17:34 - Dave Vieglais

- Target version changed from Sprint-2012.19-Block.3.2 to Sprint-2012.21-Block.3.3
- Position set to 1
