Infrastructure - Task #2780

Story # 2523 (Closed): authorization implementations should be centralized

utilitize AuthUtils methods in metacat authorization

2012-05-17 21:15 - Rob Nahf

Status:	Closed		**Start date:**	2012-05-17
Priority:	Normal		**Due date:**	
Assignee:	Rob Nahf		**% Done:**	100%
Category:	Metacat		**Estimated time:**	0.00 hour
Target version:				
Milestone:	CCI-1.0.0		**Story Points:**	
Product Version:				

Description

The method to create the subject list is used, but not the one to compare against the access policy.

History

#1 - 2012-05-18 23:23 - Ben Leinfelder

Do you mean we should be using this method in the CN/MN implementation on Metacat?

AuthUtils.isAuthorized(Collection subjectSet, Permission requestedPerm, SystemMetadata systemMetadata)

#2 - 2014-10-02 18:12 - Rob Nahf

- Assignee changed from Ben Leinfelder to Rob Nahf

this seems like only half implemented (there are 2 methods meant to be used together). Rob to review to find out why and if it matters.
