Target version:	Sprint-2012.21-Block.3.3		
Story Points:			

Description

The example resource maps in the architecture documentation showed URIs for object references constructed using /object/ rather than /resolve/

This is corrected in the docs, but tools that generate and consume resource maps will need to be checked for consistency.

Subtasks:

Task # 2836: Update docs to use resolve in examples and text	Closed
Task # 2837: Update KNB / Metcat resource map generation to use resolve rather than get...	Closed
Task # 2838: Update CLI to generate resource maps with resolve rather than getObject URIs	Closed
Task # 2839: Verify change in resource map URI construct won't affect indexing	Closed
