Description
The URIs for object references should use resolve rather than getObject uris. example:
https://cn.dataone.org/cn/v1/resolve/scidata_id
rather than
https://cn.dataone.org/cn/v1/object/scidata_id
This was an error in the documentation which is being corrected

Surprisingly few places where this was. Unfortunately, "object" is a heavily used word.

More testing will be done.
