# **Description**

We decided that the /sysadmin folder in subversion is the appropriate location for a secure production password and config file. Create this and encrypt it with the keys of those responsible for the production environment. Ensure those people also have access to /sysadmin in SVN.

### **History**

# #1 - 2012-06-06 18:57 - Dave Vieglais

- Status changed from New to Closed

Password file created under:

https://repository.dataone.org/sysadmin/PW/

This file is intended for services running on CNs, not for shell accounts and so forth.
