Target version:	Sprint-2012.23-Block.3.4	Story Points:	
Milestone:	CCI-1.0.1		
Product Version:	*		

Description

Update debian package scripts to stop removing log and search index solr core data and configuration directories on upgrade.

Remove rm lines from prerm.

Conditionally create initial log and search index solr cores for fresh installs and skip for upgrades.

Should include in 1.0.1 patch of dataone-cn-solr so next upgrade of component does not also suffer from this issue.

History

#1 - 2012-06-18 17:22 - Skye Roseboom

- Status changed from In Progress to Closed

tested in cn-dev. added to 1.0.0 branch for 1.0.1 release.
