

Infrastructure - Story #2987

Track CI use during release process

2012-06-20 14:13 - Dave Vieglaiss

Status:	Closed	Start date:	2012-06-20
Priority:	Normal	Due date:	
Assignee:	Dave Vieglaiss	% Done:	100%
Category:	Support Operations	Estimated time:	0.00 hour
Target version:	Sprint-2012.25-Block.4.1		
Story Points:			
Description <p>Goal is to capture usage metrics for the DataONE CI as we progress through production rollout. We currently track access to content through the API, and logs are available for the web services which should provide sufficient feedback. However, a fair amount of processing is required to generate reports from that information.</p> <p>As an intermediate mechanism, install google analytics trackers on the CNs. This will only work for users accessing onemercury or the portal, but can provide some useful baseline information to provide rapid feedback to our sponsors.</p> <p>Separate trackers for onemercury and the portal will be used.</p>			
Subtasks:			
Task # 2988: Add analytics tracking script to ONEMercury			Closed
Task # 2989: Add analytics tracker to Portal pages			Closed

History
