<b>Description</b>			
Inconsistent results when using search terms with asterisks - for example, if you search on "animal plant interaction" you get results but if you search on "animal plant interaction*" (didn't use quotes when actually doing search) then you get "Sorry, there were no results found." "animal*" returns results; "animal plant*" returns results; "interaction*" returns results but not "animal plant interaction*"

Investigating this issue. Not sure yet why this happens. Seems to be an issue with solr's asterisk search handling...
