If we want to distinguish types of contact subjects, I'd propose adding an optional "role" attribute to v2.Subject (extends v1.Subject)

- Assignee changed from Robert Waltz to Ben Leinfelder

#10 - 2014-10-01 16:57 - Robert Waltz

Defer to future release? Does not seem like 2.0 will include this schema change

#13 - 2015-07-01 17:22 - Dave Vieglais

- *Status changed from In Progress to Rejected*

- *translation missing: en.field_remaining_hours set to 0.0*

Seems superfluous to the intent of the subject information in the nodelist. Can use out of band mechanisms to identify roles.
