Description

The project sponsor has specified that a minimum of three Coordinating Nodes and three Member Nodes will be stood up and operational at the end of the first year of the project (i.e. 2010-07-31).

Rationale:: It's something the sponsor, or the directors of the sponsor need to see for assurance of progress.

Fit Criteria:: By the end of year one of the project (i.e. 2010-07-31) there will be at least:

- three operational coordinating nodes

- three operational member nodes

- Basic mirroring of content between CNs and replication of content from MNs should be enabled.
