This node represents the Brazilian LTER network of 12 sites. Met with Flávia Pezzini and Laurindo Campos and Debora Drucker on 7 Dec 2012 to discuss deployment of the PELD MN. Despite having an existing PELD Metacat server, its unclear whether they will want to continue this server, or merge it with a larger scale server at INPA that handles a broader set of data. Further details under the discussion of an INPA node.
