Description

There are numerous errors in the configuration of Nagios check_mk, especially for servers running in the test environment.

Each of the custom plugins installed needs to be updated to check machines within their environment. Current config checks only against production, which causes any of the check_mk_agent scripts on test machines to perform incorrect checks that may fail.

Subtasks:

Task # 3335: VPN Rules and configuration should be removed from os-core	Closed
Task # 3334: UFW rules need to be modified to allow access to port 6556	Closed
Task # 3307: Fix mk_hazelcast plugin	Closed
Task # 3363: Verify configuration for each server participating in Nagios	Closed
