Description

The usability working group has conducted tests with participants of the ESIP conference that assess the usability of the Mercury user interface. This ticket documents the overarching issues, and the subtasks address the individual issues. The issues have so far been summarized in a presentation stored on https://docs.dataone.org: (https://docs.dataone.org/member-area/working-groups/usability-and-assessment/dataone-usability-tests-ua-working-group/UA_ESIP _Testing_Results_AHM_2012.pptx/at_download/file).

Also, see the etherpad doc from the AHM meeting:

The participants were asked to:

1. Find where to search for data
2. Submit a data query (of their choice)
3. After finding a data set of interest, describe what their next step to retrieving the data would be
4. Download a data set
5. Identify any other issues seen or any additional features or functionality they would like to see
