

ONE Mercury - Task #3323

Feature # 3318 (Rejected): Mercury UI improvements from ESIP feedback need to be addressed

Make the display of science metadata more uniform

Description <p>We are currently using separate XSLT stylesheets to display science metadata (EML, FGDC, etc). Feedback from the usability study showed that the 'EML View', etc was confusing. Also, by not controlling the metadata display more tightly, we display conflicting information. for instance, the download button may say 'Data Files(0)' and the science metadata has online url links.</p> <p>Refer to Ranjeet's unified XSLT that they currently use at ORNL.</p> <p>Create a single view that shows the 'documentation' for the data files. We may decide to only show a subset of fields that are common to all science metadata standards. This needs discussion.</p> <p>Enable collapsible divs for each piece of science metadata to help the user manage the view.</p>
