Target version:	Sprint-2012.50-Block.6.4		
Story Points:			

Description

As in the example of mnStageLTER, which is no loger hosted at tepui.lternet.edu, we need to be able to copy content from the CN (scimeta, resource maps) to a new MN that will become the authoritative MN. We need a tool for doing so, and then need to migrate the mnStage LTER content as a test. Migrating from MN to MN is also desirable, but, with replication enabled, should be addressed.

Subtasks:

Task # 3418: Create a content migration tool to copy content from the CN to an MN	**Closed**
Task # 3420: Migrate mnStageLTER content from the CN to a new MN	**Closed**
