

Infrastructure - Task #3446

Story # 3431 (Closed): Should have a general search/query method in D1Client for searching the CN

build CN solr query method that does the url escaping

2013-01-02 23:29 - Rob Nahf

Target version:	Sprint-2012.50-Block.6.4	Story Points:	
Milestone:	None		
Product Version:	*		

Description

since this is a high-level component, we want the method to provide the appropriate solr escaping of the query string

confirm that Solr doesn't change the set of characters needing to be escaped wrt/ Lucene

http://lucene.apache.org/core/old_versioned_docs/versions/2_9_1/queryparsersyntax.html#Escaping Special Characters

from epad:
proper encoding for Solr is an outstanding issue (Lucene-based escaping)
chars to escape: + - & | ! () { } [] ^ " ~ * ? : \\
escape special chars with: \
only query values should be escaped

History

#1 - 2013-01-02 23:46 - Rob Nahf

- Description updated
- Assignee set to Rob Nahf
- Category set to d1_client_r

#2 - 2013-01-09 17:11 - Rob Nahf

- Status changed from New to In Progress

#3 - 2013-01-10 22:27 - Rob Nahf

- Status changed from In Progress to Closed
- translation missing: en.field_remaining_hours set to 0.0
- % Done changed from 0 to 100

completed implementation of 2 methods, one that takes a named list, of query key-value pairs, and another that takes a pre-encoded string.
