Assignee:	Chad Berkley	% Done:	100%
Category:	Metacat	Estimated time:	0.00 hour
Target version:	CCI-0.4		
Story Points:			
Description As the Metacat product manager, I want to implement support for arbitrary identifiers in Metacat in order to be compatible with the DataONE identifier <ul style="list-style-type: none">• involves creating an additional mapping table to store GUID and LocalID mapping• involves creating amethod to generate a LocalID when a request comes in using a GUID• involves refactoring handler methods to allow CRUD operations to support GUIDs
