<b>Product Version:</b>	*		

**Description**

The MN web tester should be warning rather than stopping further tests when the initial check for a 200 OK response instead returns a 404.

This is affecting further progress on testing the EDAC member node, which is returning a 404 for the baseURL, but the remainder of the services appear to be valid, though are not checked because of the initial 404.

The baseURL for the EDAC node is:

<http://gstore.unm.edu/apps/dataone>

but the service endpoint:

<http://gstore.unm.edu/apps/dataone/v1>

works as expected.

History

#1 - 2013-01-18 23:24 - Rob Nahf

- Status changed from New to Rejected

The WebTester does continue past the first test, but the user has to select the maximum tier to test to 'Tier1'or higher. Probably it was left at Tier0?
