I think we've now decided to not use reflecto in [DataONE](#) because we have embedded the Trac repository browser there. If someone still wants to incorporate the reflecto view of SVN in plone please comment here. If nobody has requested this feature then I'll go ahead and close this ticket.

No further comments have arisen about the need for reflecto in addition to the Trac browser, so I am closing this ticket. If reflecto is desired, reopen the ticket.
