<b>Description</b>	
<p>Arctos is a collaborative Collection Management Information System that currently serves over 1.7 million records from multiple natural history collections. The data reside in an Oracle database administered by the Texas Advanced Computing Center. We are looking for off-site options for data backup and disaster recovery, and would like to discuss the possibility of partnering with DataONE for this purpose. Perhaps we can set up a conference call to discuss this?</p> <p>Contacts:Carla Cicero <a href="mailto:ccicero@berkeley.edu">ccicero@berkeley.edu</a> Dusty McDonald <a href="mailto:dustymc@gmail.com">dustymc@gmail.com</a>, Chris Jordan <a href="mailto:ctjordan@tacc.utexas.edu">ctjordan@tacc.utexas.edu</a>, Link Olson <a href="mailto:leolson@alaska.edu">leolson@alaska.edu</a>, Gordon Jarrell <a href="mailto:gordon.jarrell@gmail.com">gordon.jarrell@gmail.com</a></p> <p>Conference Call on 24 January 2013</p>
