Description

Thursday 02:57:58pm roger Rob, got this message from the MN tester: Tier Passed (Ignored Tests present). [RunCount=21 Failures/Errors=0 Ignored=0]. Does it conflict with itself, saying both that there were ignored tests and that ignored=0?

Thursday 03:00:46pm rob technically, yes, but I think that's an artifact. I don't think the web testing framework can listen for 'ignore events'
