Description			
Install the new production urn:node:CLOEBIRD certificate, and update the node document on the MN and CN to be named 'Cornell Lab of Ornithology eBird', and change the other fields appropriately. Work with Kevin Webb on this, likely.			
Also, the content of the database will need to be changed. At the moment, there are 8 objects registered on the CN, some archived:			
metacat=# select guid, obsoletes, obsoleted_by, archived, object_format from systemmetadata where authoritative_member_node = 'urn:node:CLOAKN';			
guid obsoletes obsoleted_by archived object_format

The systemmetadata.authoritative_member_node column will need to be updated on the MN, as well as the systemmetadata.origin_member_node. This will also require a Tomcat restart to re-populate the hzSystemMetadata map.

Per Steve Kelling, the eBird MN should be described as "Cornell Lab of Ornithology eBird database", email 3/1/13. I will change the MN description document to reflect this.
