Target version:	2013.16-Block.2.4	Story Points:	
Milestone:	None		
Product Version:	*		

Description

Need to provide a version of the the index processor jar as a library for use in other components - like a web app. Need a non-shaded deamon packaged version of the jar.

Initially provided, but discovered changes to pom configuration to provide original (non-shade) jar broke the daemon packaging.

Looking to create a second pom file and hudson job - so there is one pom/hudson job for the library version and one for the the daemon packaged version of the index processor.

History

#1 - 2013-04-19 21:01 - Skye Roseboom

- Status changed from In Progress to Closed

- translation missing: en.field_remaining_hours set to 0.0

fixed maven/shade plugin configuration to deploy dependency free version of jar to maven repo while using deamon/executable/self contained version for downstream debian packaging.
