maven assembly does include dependencies, but only after unpacking the .class files from their respective jars.

Trying this instead: <http://stackoverflow.com/questions/3558459/maven-packaging-dependencies-alongside-project-jar>

added dependency exclusions to libclient_java pom, so that maven plugins and their dependencies aren't brought into the project.

still need to see if I can trim down some of the dependencies and get the javadocs into the assembly.
