Description

If synchronization process will manage the CN.systemMetadataChanged requests, then via use of the d1client, it will need the ability to merge/update systemMetadata back to the metadata store.

Adding a CN.updateSystemMetadata (PUT /meta) method potentially will eliminate the need for the CN methods CNCore.archive(), CNCore.setObsoletedBy(), CNReplication.setReplicationStatus(), CNReplication.setReplicationPolicy(), and CNReplication.deleteReplicationMetadata().
