**Description**

In the rdf:resource attribute, your urls are directing users back to your member node. For objects listed in DataONE, we have the url point to our resolution service on the coordinating nodes. The reason we do that is to separate the entity from where it's located.

The " <https://cn.dataone.org/cn/v1/resolve> " method returns all of the member nodes where the item can be found, so that if a node is down for some reason, or the content is migrated to a different server, the url in the map still works.

so instead of:

[cito:isDocumentedBy](#) <http://129.24.63.115/apps/dataone/v1/object/5760e5ef-efef-4c97-b393-79850d1b67b3/cito:isDocumentedBy>

it should be:
