Infrastructure - Task #3806

Add xmlstarlet to base CN Ansible install

2013-06-14 15:52 - Chris Jones

Status:	Closed	**Start date:**	2013-06-14
Priority:	Normal	**Due date:**	
Assignee:	Chris Brumgard	**% Done:**	100%
Category:	d1_cn_buildout	**Estimated time:**	0.00 hour
Target version:	2013.24-Block.3.4		
Milestone:	None	**Story Points:**	
Product Version:	*		

Description

For all CN deployments, we should have an Ansible configuration for xmlstarlet. I've been installing it manually on CNs via apt-get when trying to troubleshoot SSL issues.

History

#1 - 2013-06-14 15:56 - Chris Jones

In the installation, we should also create a symlink from /usr/bin/xmlstarlet to /usr/bin/xml.

#2 - 2013-06-14 17:15 - Chris Brumgard

- Assignee changed from David Doyle to Chris Brumgard

I'm taking ownership of this task.

#3 - 2013-06-17 16:12 - Chris Brumgard

- Status changed from New to Closed

- translation missing: en.field_remaining_hours set to 0.0

Finished. Ansible will now install xmlstarlet and create the required soft link as a dependency for dataone-cn-os-core.
