

Infrastructure - Task #3807

Story # 1906 (Closed): Review, revise, and update architecture documentation

Add documentation for Types.QueryEngineDescription

2013-06-14 15:56 - Roger Dahl

Status:	New	Start date:	2013-06-14
Priority:	Normal	Due date:	
Assignee:	Dave Vieglais	% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	Maintenance Backlog		
Milestone:	None	Story Points:	
Product Version:			
Description			
Types.QueryEngineDescription is returned by CNRead.getQueryEngineDescription().			

History

#1 - 2014-09-21 15:28 - unset unset

Any progress on this one? Its part of the tier 1 MN implementation, needs documentation.
heres the v.1.1 XML

[xs:annotation](#)

[xs:documentation](#)Describes a query engine that can be used to search content on the node.

Query engines may be general purpose or specialized for particular communities or domains.[/xs:documentation](#)

[/xs:annotation](#)

[xs:sequence](#)

[xs:annotation](#)

[xs:documentation](#)The version of the underlying query engine. Used by clients to determine possible compatibility concerns or features available.[/xs:documentation](#)

[/xs:annotation](#)

[/xs:element](#)

[xs:annotation](#)

[xs:documentation](#)Version of the schema in use by the query engine, e.g. "1.0.1"[/xs:documentation](#)

[/xs:annotation](#)

[/xs:element](#)

[xs:annotation](#)

[xs:documentation](#)The full, human readable name of the query engine. For example:

"Apache SOLR"[/xs:documentation](#)

[/xs:annotation](#)

[/xs:element](#)

[xs:annotation](#)

[xs:documentation](#)An optional human readable description of the query engine. This can be used to describe any special capabilities or intended uses for the query engine. For example, a query engine may be tuned to suit a particular audience or domain as opposed to providing a general purpose discovery mechanism.[/xs:documentation](#)

[xs:documentation](#)This field may also contain links to additional information about the query engine,

such as documentation for the search syntax provided by the query engine implemntors.[/xs:documentation](#)

[/xs:annotation](#)

[/xs:element](#)

[xs:annotation](#)

[xs:documentation](#)A list of query fields supported by the query engine.[/xs:documentation](#)

[/xs:annotation](#)

[/xs:element](#)

[/xs:sequence](#)

[/xs:complexType](#)
