Description			
Identify a location for storing user oriented documentation and guides. A couple of options:			
1. Use the existing operations docs project			
2. Create a new sphinx project			
3. Create a subversion folder and enable a mechanism for RT rendering of markup using something like pandoc			
Once selected, config and document it.			

History

a while back, at your suggestion, I created a "guides" directory in SVN <https://repository.dataone.org/documents/Projects/cicore/guides/>

some, well, all of the content in there is pre-draft quality, but has some good bits.
