<b>Target version:</b>			
<b>Description</b>			
The <a href="#">DataONE</a> cyberinfrastructure must provide a mechanism supporting the storage of data and metadata (seems kind of obvious, but it is a requirement).			
Rationale			
This is a fundamental requirement of the infrastructure addressing the RFP.			
Fit Criteria			
<ul style="list-style-type: none"><li>data and metadata can be stored into the <a href="#">DataONE</a> cyberinfrastructure and be retrieved at a later time</li><li>Existing data with associated metadata can be added to the <a href="#">DataONE</a> infrastructure</li></ul>
