Description

Ranjeet,

You've fixed this issue on the ORNLDAAC, but it remains on USGSCSAS: when trying to call listObjects() with a formatId with colons in it, the server throws a 500 Internal Error:

http://mercury-ops2.ornl.gov/clearinghouse/mn/v1/object?count=1000&formatId=http://www.openarchives.org/ore/terms

It should be able to handle any special characters in the formatIds like the above colon. Thanks!
