Description

The second paragraph of <http://mule1.dataone.org/ArchitectureDocs-current/design/DataPackage.html>, the architecture documentation, contains an external link <http://www.openarchives.org/ore/terms> which appears to now be 404-dead. This URL appears at least one more time throughout this page (and may elsewhere on Mule, not sure).

I think it is just a bad URL.

The URL mentioned is actually a namespace. The doc was updated to indicate thus.
