

Infrastructure - Task #3884

Add monitor and notification for DNS server IP address change

2013-08-05 16:42 - Dave Vieglais

Status:	Rejected	Start date:	2013-08-05
Priority:	Normal	Due date:	
Assignee:	Dave Vieglais	% Done:	0%
Category:	Support Operations	Estimated time:	0.00 hour
Target version:		Story Points:	
Milestone:	None		
Product Version:			

Description

The IP address of ns2.afraid.org changed, and because DNS zone ACLs are defined with IP addresses instead of domain names, the re-based afraid.org backup DNS server was blocked from zone transfer.

This task is to add a monitor to check the ip address of ns2.afraid.org and send notification if it changes.

This should be done through nagios.

History

#1 - 2014-03-18 12:43 - Dave Vieglais

- Status changed from New to Rejected

- translation missing: en.field_remaining_hours set to 0.0

No longer necessary as we have moved to the Amazon Route 53 DNS system.
