I've added these formats, although audio/mpeg3 is audio/mpeg (standard), and have asked Ryan to make the change in his database. After parsing all of the object formats from the object list at https://datadryad.org, I've found some others that needed adding/modifying, and Ryan is aware of them (via email):

1) application/bzip2
This is already in the format list as application/x-bzip2. Do you mind changing these?

2) application/rdf+xml
Added this to the format list

3)application/gnutar
4)application/tar
These are in the format list as application/x-tar. Do you mind changing these?

5) application/vnd.google-earth.kml+xml
Added this to the format list

6) application/vnd.ms-powerpoint
Added this to the format list

7) application/vnd.openxmlformats-officedocument.presentationml.presentation
Added this to the format list

8) audio/mpeg3
I've added audio/mpeg since this is the accepted media type according to iana.org and RFC3003. Do you mind changing these?
