Target version:	Operational		
Story Points:			
Description			
This will be used so they can set up SSL without a self-signed certificate. Should be issued to "mynpn-dev.usanpn.org" and signed by the DataONE Test CA.			
The "lmarsh" account should have access to download the cert/key when ready - same as the client cert/key.			

Associated revisions

Revision 4ee18edb - 2013-10-03 22:38 - Chris Jones

Add the USANPN server-side certificate. This refs and closes #3966. I'll upload the cert and key to dev-testing.dataone.org for Lee Marsh to download.

Revision 12658 - 2013-10-03 22:38 - Chris Jones

Add the USANPN server-side certificate. This refs and closes #3966. I'll upload the cert and key to dev-testing.dataone.org for Lee Marsh to download.

Revision 12658 - 2013-10-03 22:38 - Chris Jones

Add the USANPN server-side certificate. This refs and closes #3966. I'll upload the cert and key to dev-testing.dataone.org for Lee Marsh to download.

History

#1 - 2013-10-03 22:42 - Chris Jones

- Status changed from New to Closed
- translation missing: en.field_remaining_hours set to 0.0

I've generated the cert and key, and have uploaded to <https://dev-testing.dataone.org/usanpn> so Lee can download it.

#2 - 2013-11-07 00:38 - Bruce Wilson

- % Done changed from 0 to 100
- Estimated time set to 0.00

#3 - 2013-11-07 00:39 - Bruce Wilson

- Target version changed from 315 to Operational
