Turns out dashes are not allowed in our NodeIds:

<http://mule1.dataone.org/ArchitectureDocs-current/design/NodeIdentity.html>

And so the original certificate needs to be revoked and a new one generated with a NodeId that uses an underscore (_) rather than a dash (-).

#8 - 2014-01-17 21:01 - Matthew Jones

Regenerated the node certificate using the new node ID urn:node:ILTER_EUROPE

Uploaded the certs to the web for download by ILTER personnel. Still need to revoke old certificates.

#9 - 2014-01-17 21:56 - Matthew Jones

- *Status changed from In Progress to Closed*

- *Assignee changed from Dave Vieglais to Matthew Jones*

Revoked the original certificate that used a dash in the name, and distributed CRL lists to CNs.
