Description

I logged on to the production portal a couple months ago using the University of Kansas IdP and obtained a subject of:

CN=David Vieglais A7151,O=University of Kansas,C=US,DC=cilogon,DC=org

Logging on today, my subject is now:

CN=David Vieglais A2105,O=University of Kansas,C=US,DC=cilogon,DC=org

This lack of consistency is a serious problem for managing identity equivalence within DataONE. It is not clear if this is an issue with the IdP (KU) or with CILogon.

Will discuss issue with Jim Basney.
