Product Version:	*			

Description

create classes for all Data Types in Java

History

#1 - 2010-03-23 09:34 - Matthew Jones

Completed definitions of about 80% of types from the specifications , remainder have unresolved issues. Some classes are only partially implemented (e.g., subfields missing, lack of serialization/deserialization methods), so will need to be revisited. Need to decide on approach to representing enumerations, especially when those might be dynamic -- currently hardcoded in classes, but this is not ideal.

#2 - 2010-03-26 00:51 - Matthew Jones

Finished SystemMetadata class so now all Types are completed for 0.3 release.
