<b>Target version:</b>			
<b>Story Points:</b>			
<b>Description</b> In Metacat version 2.2.x we renamed the default war file to "metacat.war" to avoid KNB branding any given deployment of Metacat.  We should update the CN stack to handle this change even though we are not necessarily targeting fixes in Metacat for CN functionality.			
<b>Subtasks:</b>			
Task # 4048: Update cn-buildout to handle "metacat" context			Closed
Task # 4049: Configure d1_cn_rest to use "metacat" context			Closed
Task # 4050: Configure Hudson builds to handle metacat.war			Closed
