Infrastructure - Task #4059

Add test to verify node is reporting correct nodeId in log records

2013-10-07 19:09 - Dave Vieglais

Description

It appears as though some nodes are reporting the node name rather than the node identifier when returning log records.

There should be a test in the MN web tester to verify the nodeId is being accurately reported by a MN.

(not sure if this is already being done)

For example, USGS CSAS log entry:

6505
resourceMap_doi_10.5066_F7CF9N17.xml
xxxxxx
Java/1.6.0_38
object
read
